**Attachments:** Hoosick Falls (V) Temp GAC Endorse[1].pdf; Hoosick Falls\_Jan 5\_2016.pdf; Hoosick Falls TPs\_Simon comments.docx

I've attached a small markup of the talking points, mostly just to update the part about the temporary treatment system, so as to take account of the latest developments. The Village has some new info on its web site about the temporary system,  
<http://www.villageofhoosickfalls.com/>:

"Temporary GAC Filtering System to be Installed:  
January 7, 2015: The Village in cooperation with the NYSDOH, Saint-Gobain, and C.T. Male have been exploring installing a temporary short-term GAC filtering system at the municipal water plant. This system can be installed in a matter of weeks, and will remain in use while the permanent GAC filtering is being built. There is only one of the required temporary GAC systems available at this time, so the parties involved in designing and approving the system have been working diligently to insure that we did not lose this opportunity to another entity that may have a similar filtering need. The DOH has reviewed and approved the plans, and the board has voted to order the temporary GAC filter to be installed immediately. Further details will be shared as the project progresses."

And there's a link on the Village's web site to the attached letter from DOH, endorsing the proposed temporary treatment system.

Slide 15 is the wrong document. It was our January 5th document (attached), not the Nov 25 ltr., that contained our recommendations about providing >5 gals a day, etc.

Hi Judith,

I have attached the formatted Hoosick Falls talking points, as well as the corresponding PPT that Andrew put together. Please let me know if you would also like me to print off a few copies to put in your book.

Best,
